To the Trade . .

Constant efforts in research gives to us each season ideas of producing better quality and larger quantities of plant material at prices attractive to our customers. We solicit your visits so we may have the pleasure of showing you our material for this season.

Our plants in containers compare with field grown and can be safely planted any month of the year. Let us urge you to educate your clientel in knowing that we can plant anytime.

Your patronage has been the contributing factor in our success and we sincerely solicit your inquiries this fall, we are

SOUTHERN STATES NURSERIES, INC.

Plant America!

Terms and Conditions

TERMS: We offer usual terms to those of known responsibility. Where the purchaser's credit responsibility is unknown to us, cash is required before shipping, or references must be furnished with proper time for investigation. On all C. O. D. shipments one-fourth cash must accompany your order.

PRICES: All prices listed are F. O. B. our nursery. Packing at cost. We will accept order 5 at the 10 rate, 50 at the 100 rate, 500 at the 1000 rate. Prices listed herein are subject to change without notice, and are made for immediate acceptance. On reserve orders we require a twenty-five per cent deposit.

SHIPPING: Customers are requested to give definite instructions. We ship by Rail, Freight, Motor Freight, Express and Boat lines.

CLAIMS: All claims must be made immediately upon receipt of stock. While we use every means of prompt service, we will not be responsible for delays in transit. Our responsibility ceases upon delivery in good condition to the transportation company.

SUBSTITUTIONS: We never make substitutions on orders unless instructed by the purchaser.

GUARANTEE: We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice.

CAUTION: We accept all orders subject to crop conditions and on condition that same be void if such occurs beyond our control. If you do not find the stock you desire listed, write us and we will get it for you. Many times our quantities will not permit us to list items.

AZALEAS (INDICA)

All of our Azaleas are pruned, compact, specimen plants. We are limited in quantity and variety so we urge ordering early.

COCCINEA MAJOR—Brilliant orange red, good foliage and grower. Size 12-18".

DUC de ROHAN—One of the better varieties for potting. Compact grower with light green foliage. A very profuse bloomer. Size 12-18".

PINK ELEGANS—Early bloomer of light pink. Good upright grower. Similar to Formosa. Sizes 12-18", 18-24", 2-3', 3-4'.

FIELDERS' WHITE—One of the finest whites. A good grower, large foliage and pure white flowers. Size 12-18".

FORMOSA—Vigorous grower — common but we think best of all and most popular. Good for landscape designs. Hardy and requires least care. Will thrive in varied soil conditions. Sizes 12-18", 18-24" and 2-3'.

GEORGE FRANC—Early bloomer with flowers of salmon-pink completely covering the plant. Sizes 8-12", 12-18".

GLORY OF SUNNINGHILL—Compact grower with shiny narrow leaves and vivid orange-red flowers. One of the latest to bloom. Size 8-12".

GEORGE LINDLEY TABOR—Large lavender-pink flowers. A wonderful grower and very hardy. Sizes 12-18", 18-24".

EVERYANNA—Low compact grower. Late bloomer with large white flowers with pink stripes. Size 12-18".

LAWSAL—Mid-season, profuse bloomer of salmon flowers. Very showy and good grower. Sizes 8-12", 12-18", 2-3' and 3-4'.

NEW INDICA WHITE—Compact grower with dark green foliage. Pure white large flowers. Good for borders. Size 8-12", 12-18".

OMURSAKI—Very upright and vigorous grower. One of the old lavender favorites. Large flowers. Sizes 12-18", 18-24", 2-3', 3-4' and 4-5'.

PHOENICA—Vigorous, upright grower. Medium-sized foliage of a dark green color, large purplish-pink flowers. Sizes 12-18", 2-3'.

PRIDE OF DORKING—Our favorite of all red Azaleas. A wonderful variety for color, foliage and growth. Size 12-18".

PRIDE OF MOBILE—Similar to Elegans. Flowers a little larger and brighter pink color. A good grower but more compact than Elegans. Very popular with everyone. Sizes 8-12", 12-18".

PRIDE OF SUMMERTON—Very good grower and wonderful foliage. Large salmon flowers. Sizes 12-18", 18-24".

SUBLANCEOLATA RHODALEA—The best of all orange-red azaleas. Strong grower with large flowers in beautiful color. Generally blooms singular and throughout season. Its popularity cannot be excelled. Sizes 12-18", 18-24", 2-3'.

SUBLANCEOLATA ROSEA—Similar in growth but leaves are a little smaller. Dull, fascinating large pink flowers. A must in every nursery. Sizes 12-18", 18-24", 2-3'.

ORANGE (Variegated)—This variety is relatively new in our country, coming to us from South America. The foliage and fruit has a very beautiful green and white variegation. The fruit is mid-season and is identical to our Florida oranges in size and quality. An outstanding fruit for any garden and possesses good quality for commercial uses. Price on these will be the same as our other oranges.

"Canned Japonicas"

CAMELLIA SASANQUA (Field Grown)

One of the finest of all broad-leaved evergreens. A member of the Camellia family, but looser and faster growing. Very profuse bloomers, flowers opening in early September and extending through November — a time when flowers are scarce.

We have many testimonials claiming our plants acclimate themselves better and quicker to most soils of any Sasanquas purchased. Sasanquas are very hardy and can be grown without much protection in the areas around Atlanta, Memphis, Charlotte, Birmingham and farther on the Atlantic Seaboard. Prices run parallel with ornamental shrubbery.

ANNETTE—Two-tone pink and white variegated. Dense growth, flower petals have crepe paper-like formation.

BUTTERFLY—Flowers large single flesh pink. Wonderful foliage and good grower.

'Field Grown Sasanquas'

CLEOPATRA—Large, beautiful cherry-red flowers and crinkled petals, foliage dark, glossy green and thick. Vigorous grower, yet compact.

MINE-O-YUKI—(Snow on the Mountain) Large, double white flowers resembling a carnation. Such bloom profusion that it literally covers the plant. When young, it is a loose open grower. As it ages it develops into a symmetrical round and compact specimen.

ROSEA—A graceful and upright grower with flowers of brilliant pink. Dark green foliage.

SETSUGEKKA—A new variety of great beauty and merit. The large, semi-double flowers are pure white, with just a touch of pink at the ends of the slightly ruffled petals. The plant is erect and compact in habit, with dark, handsome foliage. Very valuable.

--------------	------------	-------	--------

LIGUSTRUM

Grafted Ligustrum in all varieties are very scarce this season and we urge all of our customers to see about their needs immediately. We have our usual wide variety but very much limited in quantity.

Grafted Ligustrum are far superior to rooted ones because of their escape from Nematode (root-knot). The foliage is darker, more glossy and irregular in shape, which gives it more effective beauty. Grafted Ligustrum are outstanding in all varieties.

Grafted Ligustrum — “Our Specialty”

LIGUSTRUM LUCIDUM (Trimmed bushy Specimens)

		per 10	per 100	per 1000
12-18 inches	B&B	\$11.10	\$100.00	\$ 850.00

18-24 inches	B&B	15.00	140.00
2-3 feet	B&B	17.50	

LIGUSTRUM ERECTA—An outstanding upright variety introduced by us five years ago, with its glossy leaves in abundance on each branch with a smaller leaf at the base of each larger one. Very popular in landscape work.

LIGUSTRUM EXCELSUM—A beautiful variegated green and white foliage. Upright in growth.

LIGUSTRUM FRASERII—A new discovery of ours. A variegated orange sport of the Nobilis variety that holds its color the year around. Very effective in landscape design because of the orange and green variegation.

LIGUSTRUM NOBILIS—Upright, glossy green leaves similar to Lucidum. Very effective in landscape designs.

"Handsome Erecta"

Fraserii

“Another New Ligustrum”
FRASERII

A new variety of variegated orange upright Ligustrum which we have been experimenting with for about four years. This is a sport from the Nobilis variety and really has a place in every landscape design because of its habit in growth, beautiful variegated foliage. This color effect remains the same year round. This variety can be transplanted easily without self-defoliation.

This variety has been named after J. B. Fraser, of our Company, for the many great contributions he has given to the Nursery Industry. Years of devoted experience in the fields of research merits this award to him.

HOLLIES

Our Hollies are grafted, scions taken from well-fruited trees. Properly pruned either with foliage laying close to ground or tree shape. Our trees produce berries the first year. Our Hollies are young, thrifty, thus enabling us to transplant easily. We have a great many of these in sizes ranging from 2 to 3 feet to 12 to 14 feet.

ILEX EAST PALATKA—A beautiful Holly with few thorns, very glossy foliage. A very heavy bearer of fruit. Fruit large and brilliant red color. Can make nice sheared specimens in this variety.

ILEX HOWARDII—A popular variety because it is a very much improved strain of the *Ilex Opaca* (American). Foliage glossy and dark green. Dark red berries and thorny leaves.

ILEX LOUISE HOLMES—A new discovery of ours being placed on the market for the first time this season. Very much upright as a tree holly, large red berries that ripen around the 15th of October, leaves much larger than East Palatka and a very glossy green color. This is really something to have in any garden.

ILEX HOWARDII

Wire Balling

We strongly recommend the use of wire-balls on all larger size shade trees and ornamentals. This has proven to be a safeguard in the transplanting of large trees and shrubs without losing them. By wiring, we can enlarge the regular size ball that is firm.

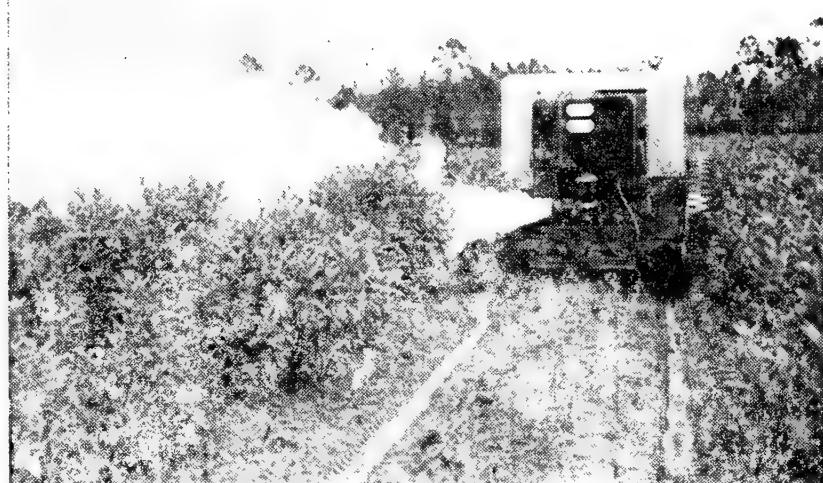

Double Palm Tree

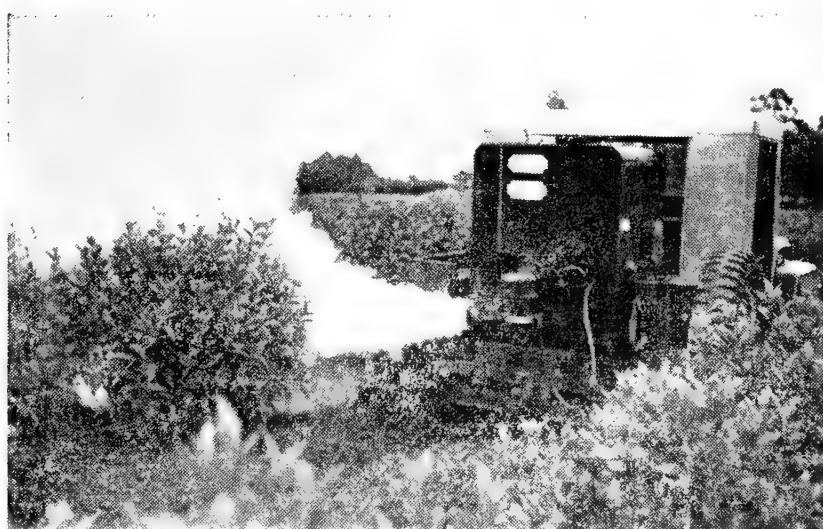

Prices on wire-balling:

24-inch ball	\$3.00
30-inch ball	3.50
36-inch ball	4.00
48-inch ball	5.00

Spraying Produces Plant Beauty and Quality

A contributing factor in the making of the quality in our plant material is attributed to this new FOG machine. We have discovered through costly experiments that regular spraying produces quality in plants as well as the freeing of disease and insects. From certain kinds of spray material we have found them to be very vitalizing and at the same time conquerors of destructive scales and diseases.

As you have experienced, spraying in the past has been very expensive and not very thorough in most instances. This new method is very reasonable and does such a thorough job. Enough can be saved in spray materials alone to pay for such an operation in a very short time, not counting anything saved in your labor costs. We would be very happy for you to visit us and show you exactly how this machine operates.

Chief Chemist

FLORAHOME PEAT HUMUS has been available to the trade for the past several years, and during that time we have established many customers who use it each season in their propagating beds, Azalea and Camellia beds, and even for other purposes. We have many testimonials from customers who prefer it to any Humus ever offered and through mouth advertisement such as this we are increasing our regular list of customers for our Humus.

We advise ordering in carload lots as much extra yardage is added without cost in each car. We can ship a minimum car of 30 tons or a maximum car of 40 tons. We guarantee this Peat Humus to be absolutely free of sand, seeds, roots and other non-essential ingredients. Before pulverizing this humus, it possesses a fibrous appearance and shows its absolute decayed vegetation. One cubic yard of semi-dry humus will weigh approximately 700 pounds or one cubic yard of dry humus will weigh approximately 350 pounds. Prices below are loaded in freight cars, F.O.B., Florahome, Florida.

Semi-dry Peat Humus \$7.00 per ton.

Semi-dry Peat Humus \$10.00 per ton sacked.
